PROFESSIONAL EXPERIENCE

Application Developer Supervisor; (South Asia Link Finance Corp.)   *April 2024 – Present*

- Developed a system from scratch including planning, structuring, and coding the core functionalities to ensure robust, scalable, and efficient performance.
- Supervised a team of developers, providing guidance, setting project goals, and ensuring timely progress, quality standards, and adherence to best practices.
- Actively involved in UI/UX design, working closely on user interface layouts, enhancing user experience, and ensuring the design aligns with the system's overall functionality and aesthetics.
- Led Efforts to integrate essential features, including database structuring, API setup, and server configuration, for seamless system functionality and reliable performance.

Full-stack Developer; (20023 Branded Tech Inc)   *August 2023 – March 2024*

- Maintained an existing website involving updating, securing, optimizing, and monitoring its performance.
- Debugged and enhanced a functioning website's performance, identifying and resolving errors, then implementing optimizations for better speed, responsiveness, and functionality, ensuring an enhanced user experience across devices and platforms.
- Built a full-stack web application from scratch using the latest technology, involving designing interfaces, implementing features, integrating databases, setting up servers, and deploying seamless functionality.

Front-end Developer Intern; (Excellence & Innovation)   *May 2023 – July 2023*

- Built and maintained responsive and user-friendly web interfaces.
- Collaborated with back-end developers to implement and integrate front-end components.
- Kept up with industry trends and advancements in front-end development.

PROJECT HANDLED

Loan Origination System (LOS) Web Application; Application Developer Supervisor

- **Description:** An LOS (Loan Origination System) is a digital platform that helps financial institutions manage and streamline the loan application, processing, and approval process. It is commonly used by banks, credit unions, and other lending institutions to reduce manual work, increase processing speed, and improve data accuracy and compliance.
- **Technologies Used:** React, CSS, Tailwind, MS SQL, Prisma ORM, Typescript, Redux Toolkit, MUI, LDAP
- **Role and Responsibilities:**
  - Initiated and led the development of a project from inception, providing comprehensive oversight, team guidance, and project direction.
  - Designed innovative system features to enhance user experience, maximize satisfaction, and optimize platform functionalities.
  - Collaborated closely with the development team and QA/BA to resolve bugs, introduce new functions, and ensure all requirements were effectively met.

HR Management System (HRMS) Web Application; Full-stack Developer

- **Description:** A Human Resources Management System (HRMS) web application centralizes HR functions like employee management, leave tracking, payroll, recruitment, training, and compliance. It aims to streamline processes, improve employee experience, ensure compliance, and foster organizational growth through data-driven decision-making.
- **Technologies Used:** HTML, CSS, Bootstrap, PHP, JQUERY, MySQL, Codeigniter
- **Role and Responsibilities:**
  - Created innovative system features to enhance user experience and maximize satisfaction with the platform's functionalities.
  - Refactored existing code to enhance reusability and improve the coding standards of the web

application.
- o Collaborated with QA to address specific bugs and develop new functions, ensuring all requirements were met effectively.

Enrollment and Admission Web Application; Front-end Developer

- **Description:** An Enrollment and Admission Web Application simplifies the process of applying to educational institutions. It allows prospective students to submit application materials, track their application status, and receive important notifications about deadlines and updates, streamlining the admissions process for both applicants and administrators.
- **Technologies Used:** HTML, CSS, React, PHP, MySQL, Tailwind
- **Role and Responsibilities:**
  - o Collaborated with the back-end team to integrate front-end components with server-side APIs.
  - o Implemented responsive layouts and user-friendly interfaces.
  - o Developed form validation and data submission features to ensure accurate and secure data collection.

Inventory System for Clinic Supply and Student Health Records Web Application; Main Developer

- **Description:** The Inventory System for Clinic Supply and Student Health Records Web Application manages clinic supplies and student health records in educational institutions. It tracks inventory, handles supply orders, and maintains detailed health records for efficient management and accurate documentation of student health information.
- **Technologies Used:** HTML, CSS, Bootstrap, PHP, MySQL, Google Apps Script
- **Role and Responsibilities:**
  - o Independently developed the entire web application, managing all aspects of front-end development.
  - o Implemented responsive and user-friendly interfaces using HTML, CSS, and JavaScript.
  - o Designed and implemented the data management system for inventory and student health records.
  - o Utilized Google Apps Script to automate notifications sent to students upon record approval or decline.
  - o Conducted thorough testing and debugging to ensure the application's reliability and performance.

EDUCATION
Richwell Colleges, Inc. | Bachelor of Science in Information System (BSIS) | Plaridel, Bulacan **| 2019 - 2023**

TECHNICAL SKILLS
Languages: HTML, CSS, JavaScript, TypeScript, PHP, C#, C++, Java, SQL
Framework/Libraries: React.js, Next.js, Node.js, Express, Spring Boot, React Native, Redux Toolkit, Codeigniter, Jquery, Tailwind, Bootstrap

SOFT SKILLS
- Strong Problem-Solving and analytical skills.
- Eagerness to learn and continuously improve my skills and knowledge.
- Excellent attention to detail and organizational skills.
- Ability to work independently and manage multiple projects simultaneously.
- Adaptability to Evolving Technologies and Methodologies, Strong in Communication, Collaboration, and Flexibility.
